

Information Type Approval Israel

Customer Information regarding Radio Type Approval in Israel

We, CTC advanced GmbH, would like to inform you about the Type Approval process in **Israel**.

In principle, only local companies can apply for Type Approval in Israel and the certificate will be issued for the importer.

Companies without known importer information can use a local representative for the purpose to obtain a Type Approval certificate. The holder of the certificate must be changed to the real importer before importing radio devices. Only the company mentioned in the certificate is allowed to import those goods to Israel.

Test Reports proving compliance with European standards are accepted in the Type Approval Process, but there are additional requirements for RFID devices transmitting above 900 MHz.

CTC advanced will be pleased to assist you in the approval process of your product on Israel market. Please feel free to contact us for further information!
