

Information Type Approval Ukraine

Customer information regarding TR RED Update in Ukraine

We, CTC advanced GmbH, would like to inform you about a change in the Type Approval process in Ukraine and the associated commencement of a new technical regulation in August 2018 (**TR-RED**).

The TR RED is based upon UA standards, which are identical to the Radio Equipment Directive [2014/53/EU](#) and being supplemented by determined **national manifestations**.

These **national manifestations** comprise:

- SRD regulations
- Radio frequency allocations

Please note:

Type Approval Documents for radio equipment manufactured and approved after 2018, April, 1st, require a TR-RED update. Testing is not necessary, if the documentation is completely submitted. This documentation is the same as you need, if you update your devices to RED.
