

Information Type Approval South Korea

Customer Information regarding Radio Type Approval in South Korea

We, CTC advanced GmbH, would like to inform you about the Type Approval process in **South Korea**.

Radio devices must be approved by RRA prior to the import and usage of those devices within South Korea.

Local, as well as foreign companies can apply for Type Approval:

- Certificate holder = local company: only this company is allowed to import those goods.
- Certificate holder = foreign company: any company is allowed to import those goods.

In-country radio tests are mandatory. If the device is (also) manufactured within the European community, EMC reports from nominated labs, such as CTC advanced, will be accepted by RRA.

Korean KN specifications are mainly slightly modified EN specifications.

A modular approval, as well as minor changes for slightly modified devices are possible.

A national label is mandatory to be affixed on the device.

CTC advanced will be pleased to assist you in the approval process of your product on South Korea market. Please feel free to contact us for further information!
