

# Information Type Approval Ukraine

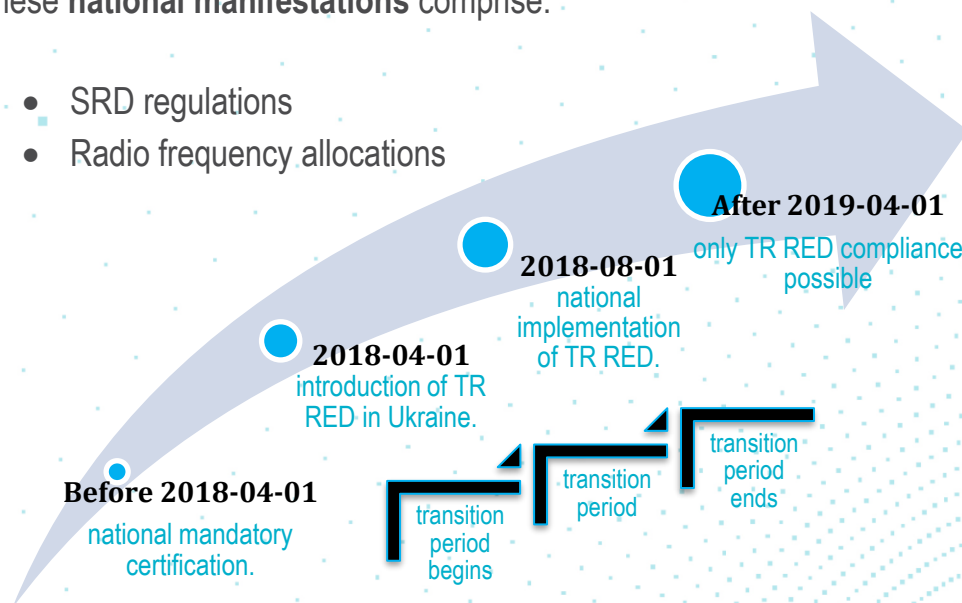

## Customer information regarding TR RED Update in Ukraine

We, CTC advanced GmbH, would like to inform you about a change in the Type Approval process in Ukraine and the associated commencement of a new technical regulation in August 2018 (TR-RED).

The TR RED is based upon UA standards, which are identical to the Radio Equipment Directive [2014/53/EU](#) and being supplemented by determined **national manifestations**.

These **national manifestations** comprise:

- SRD regulations
- Radio frequency allocations

The manufacturer has the possibility to show compliance in Ukraine e. g. with conformity assessment module A (Ukrainian DoC with Ukrainian Standards & Ukrainian language) and conformity assessment module B and C (Ukrainian "TEC" and Ukrainian DoC). This procedure is coherent to the EU conformity assessment and the manufacturer shows the same scope of documentary to comply.

The other applicable way is, to obtain the Ukrainian “TEC” and show compliance according to the module B and C. The test reports conducted in the EU, are accepted for evaluation of conformity, but the DoC shall be declared according to the TR RED standards in Ukrainian language. Manufacturers ensure that radio equipment is constructed in such a way that it can be operated in Ukraine without infringing the existing rules on the use of radio frequencies (Article 20).

Template for the Ukrainian DoC is available and shall be filled in, according to the aforesaid requirements. The referred regulatory frame work is the **“Технічного регламенту радіообладнання, затвердженого постановою Кабінету травня 2017 р. No 355 (Офіційний вісник України, 2017 р., No 045, ст. 1396)”**.

In order to provide you the full spectrum of the TR RED compliance, please kindly refer to the second page of the link below in order to compare the compliance system RED vs. TR RED.

<http://zakon1.rada.gov.ua/laws/show/355-2017-%D0%BF/para14#n14>

The mark of conformity to the technical regulations shall be affixed to the product’s label in such a way that it is visible, legible and indelible. If it’s not possible to label your products with this conformity mark, then this conformity mark shall be affixed to the packaging and accompanying documents. For more information please kindly refer the link below.

**Please note:**

**Type Approval Documents for radio equipment manufactured and approved after 2018, April, 1<sup>st</sup>, require a TR-RED update. Testing is not necessary, if the documentation is completely submitted. In case of insufficient documentation, additional tests can be performed at CTC advanced.**

**CTC advanced will be pleased to assist you in the approval process of your product on Ukraine market. Please feel free to contact us for further information!**
